Leadership That Inspires Trust

Guided by vision. Driven by innovation.
Committed to transforming healthcare.

Dr. D. Bhaskar Rao

Chairman & Managing Director,
KIMS Group of Hospitals

A visionary leader with over three decades of healthcare leadership and nationwide network expansion.

Key achievements span quality, patient care and growth across multiple states and regions.

A strong believer in ethical practices and technology-led, patient-centric healthcare delivery.

Dr. B. Abhinay

Chief Executive Officer,
KIMS Group of Hospitals

Drives strategy & clinical excellence with a strong focus on quality, innovation and patient care.

Key roles: BMT, Robotic Surgery and advanced oncology services.

An avid marathoner and fitness enthusiast who leads by example in life and leadership.

Dr. Nilesh Shetty

Managing Director,
KIMS Hospitals, Bengaluru

25+ years in senior leadership. Former CEO of BMHRC and Executive Director – Strategy, BMHRC.

Expertise in operations, strategy and sustainable growth.

AIIMS alum with an MBA in Healthcare Management.

Mr. Sreenath Reddy

Director,
KIMS Hospitals, Bengaluru

20+ years in healthcare with expertise in business excellence and strategic management.

Leads key initiatives in operational efficiency, patient experience and service excellence.

Passionate about building high-performing teams and delivering impactful results.

Visionary Leadership

A shared commitment to driving innovation and growth.

Integrity & Ethics

Upholding the highest standards of transparency and trust.

Patient First

Every decision guided by compassion and care.

Excellence

Relentless pursuit of quality, safety and outcomes.

Why Choose KIMS Hospitals, Bengaluru?

A commitment to clinical excellence, advanced technology and compassionate care that patients and partners can trust.

Healing Begins with Expertise and Compassion

Clinical Excellence

World-class specialists and advanced evidence-based protocols delivering outstanding clinical outcomes.

International Patient Care

End-to-end support for a seamless and comfortable treatment journey from your first contact to recovery.

Advanced Technology

State-of-the-art infrastructure and cutting-edge technology for accurate diagnosis and better outcomes.

Affordable Excellence

International standards of care at a significantly lower cost without compromising on quality.

Integrity

Centres of Excellence

Comprehensive care across a wide range of specialties, delivered by expert teams using advanced technology and evidence-based practices.

Oncology

Comprehensive cancer care with advanced technology, skilled teams and compassionate support.

Cardiac Sciences

Advanced cardiac care including interventional cardiology, cardiac surgery and heart failure management.

Neurosciences

Expert care for brain, spine and nervous system disorders using robotic technology and latest expertise.

Orthopaedics & Joint Replacement

Advanced joint care, arthroscopy and replacement surgery for better mobility.

Organ Transplant

Liver, kidney, heart and bone marrow transplants with world-class outcomes.

Gastro Sciences & Hepatology

Comprehensive care for digestive disorders, liver diseases and metabolic conditions.

Urology & Andrology

Advanced urological care including robotic surgery for men and women.

Obstetrics & Gynaecology

Complete women's healthcare from fertility to maternity and beyond.

Paediatrics & Neonatology

Expert care for children with advanced NICU and paediatric specialties.

Emergency & Critical Care

24/7 emergency services and advanced critical care for highly complex cases.

Robotic Surgery

Minimally invasive robotic precision for higher success, smaller cuts and faster recovery.

Interventional Radiology

Image-guided minimally invasive procedures for accurate diagnosis and treatment.

Integrated Care. Advanced Technology.
Better Outcomes.

Our multidisciplinary teams work together seamlessly to deliver personalized care and exceptional outcomes for every patient.

Robot-Assisted Surgery

Robotic-assisted surgery at KIMS Hospitals Bengaluru is a hospital-wide capability deployed across oncology, general surgery, gynecology, urology, orthopaedics, and general surgery.

Advanced Precision

Minimally Invasive

Better Outcomes & Faster Recovery

Clinical Advantages of Robotic Surgery

- ✓ Smaller incisions, reduced blood loss and faster healing
- ✓ Significantly lower risk of conversion to open surgery
- ✓ Enhanced nerve & vessel preservation in critical anatomical zones
- ✓ Shorter hospital stay in the majority of procedures
- ✓ Reduced post-operative pain and earlier mobilisation
- ✓ Lower surgical site infection rates
- ✓ Earlier return to normal function and daily activity
- ✓ Greater surgeon confidence in anatomically complex cases

Robotic Programmes at KIMS Hospitals Bengaluru

	Abdominal Surgery	Radical prostatectomy, nephrectomy, cystectomy, colorectal resection, hepatobiliary procedures
	Oncological Surgery	Multi-visceral resection, lymph node dissection, retroperitoneal tumour surgery
	Cardiothoracic Surgery	Robot-assisted CABG, valve repair, thoracic surgery with minimal access and maximum precision
	Gynaecological Surgery	Complex pelvic surgery, hysterectomy, endometriosis resection, ovarian cystectomy
	Head & Neck Surgery	Transoral robotic surgery, thyroid & parathyroid procedures, scar-minimising neck access
	Orthopaedics	Mako robotic knee and hip replacement with real-time 3D bone mapping
	Transplantation	Minimally invasive donor nephrectomy and robotic kidney transplant

Precision Beyond Limits

Enhanced Safety

Faster Recovery Better Quality of Life

Advanced Technology Expert Care

Diagnostic & Surgical Technology

KIMS Hospitals Bengaluru's diagnostic and surgical infrastructure is benchmarked against international tertiary care standards. The hospital makes ongoing capital investment in technology that demonstrably changes clinical outcomes.

4-Arm HD da Vinci Xi

The most advanced robotic surgical platform currently available. Provides 10x magnification, full instrument articulation, and real-time tremor filtration. Used across oncology, cardiac surgery, urology, gynaecology, and general surgery.

Mako Robotic System

CT-based three-dimensional bone mapping for precisely planned and executed knee and hip replacement. Reduces implant malpositioning and improves long-term joint function outcomes.

MRgFUS (MRI-Guided Focused Ultrasound)

Non-invasive, incision-free treatment for Parkinson's disease tremors and essential tremors. Proven to reduce tremor severity and improve quality of life without the risks of open brain surgery.

Gamma Knife

Radiosurgery system delivering focused radiation beams with sub-millimeter precision for brain tumours, vascular malformations, and functional brain disorders without surgical incision.

Tulsa-Pro System

Real-time MRI-guided thermal ablation for benign prostatic hyperplasia and prostate cancer, preserving surrounding healthy tissue with no incision required.

Novalis Tx Linear Accelerator

Advanced radiation delivery system for precision radiotherapy with IMRT and IGRT capability, conforming dose precisely to tumour volumes while minimising radiation to healthy structures.

ESWL Dornier

High-energy extracorporeal shock wave lithotripsy for kidney stone fragmentation. Non-invasive, with enhanced imaging, maximised energy delivery, and no additional radiation risk.

O-Arm Intraoperative Scanner

Real-time 3D imaging during spinal surgery and complex orthopaedic procedures, enabling immediate verification of implant placement before the patient leaves the operating theatre.

Advanced Technology. Expert Care. Better Outcomes.

Advanced Critical Care

Around the Clock. Always by Your Side.

At KIMS Hospitals, our Advanced Critical Care Units are equipped to handle the most critical conditions with expertise, technology and compassion — ensuring the **highest standards of care** when it matters most.

Our Critical Care Services

Medical ICU (MICU)

Advanced care for complex medical conditions and life-threatening illnesses.

Surgical ICU (SICU)

Post-operative care and monitoring for high-risk surgical patients.

Neuro ICU (NICU)

Specialised care for neurological emergencies and critical brain conditions.

Cardiac ICU (CICU)

Comprehensive care for cardiac emergencies and post-cardiac procedures.

Paediatric ICU (PICU)

Dedicated critical care for infants, children and adolescents.

High Dependency Unit (HDU)

Continuous monitoring and step-down care for patients requiring close observation.
